

## Spontoon Radio

The Spontoon Archipelago is a group of islands in the Pacific inhabited by funny animal cartoons and seaplanes. The time is 1920-1945. Cartoonists from all over the world contribute comic strips and stories to the Spontoon website. E. O. Costello contributes original radio scripts evocative of the time and place. This Spontoon Radio project is a collaboration of the Spontoons, KFAI community radio, and the Great Northern Audio Theatre.
